DETAILED ACTION

Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because as filed, the drawings are illegible. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 5, 6, 8-13, 16, 18, 22, and 24-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regards to claims 5, 12, and 13, how is strength measured?

In regards to claim 6, the phrase "at least one other fiber" is unclear. Is this in addition to the one in claim 1?

In regards to claim 8, what is meant by "less stretching"? As compared to what?

In regards to claim 9, what is meant by "much higher elasticity and/or stretching"? As compared to what?

In regards to claim 10, what is meant by "much higher abrasion resistance and/or impregnation and/or coating"? As compared to what?

In regards to claim 11, it is unclear whether the jacket has or has not yet been heat treated.

In regards to claim 12, what is meant by "higher stiffness"? As compared to what?

In regards to claims 16 and 18, what is meant by "insensitive to moisture"?

In regards to claim 22, what is meant by "one another fiber"?

In regards to claim 24, what is meant by "45° to 90° or 90°"? Why is 90° listed twice?

In regards to claims 25-30, it is unclear what Applicant is attempting to claim since the preamble states that the invention is a rope-like structure, yet the body of the claims teaches another structure which does not further limit the "rope-like structure"? Is this intended use? Is applicant trying to claim another distinct invention?

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-32, to the degree definite, are rejected under 35 U.S.C. 102(b) as being anticipated by Land et al (6410140).

Land teaches a rope-like structure having a core, two sheathes, and at least one other fiber which is meltable and provides slip proof mutual bonding between the layers of the yarn, with the use of Kevlar, which is pre-oriented (Figure 1, Abstract).

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-32 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-24 of U.S. Patent No. 7360477. Although the conflicting claims are not identical, they are not patentably distinct from each other because each teaches a core/sheath rope-like structure with an amount of fibers binding the core to the sheath..

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fujiwara et al (20030070413) teaches what is well known in the art.
